Test account (Login: admin, password: 1)

On index page you have two link for register new user in database and login with existed

On Register page after fill new username and password create new user after that you will redirected to log in page
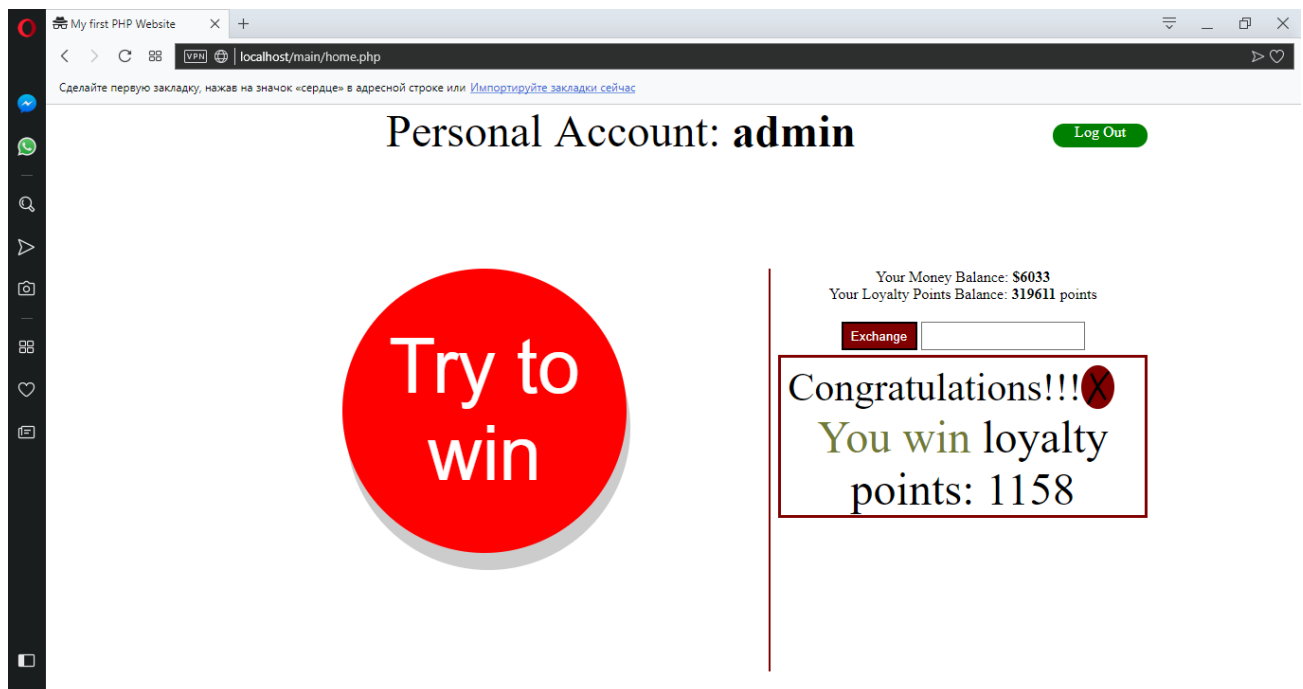

On Login page you can login with existed user

On Main page content section divided on two sections. In left section presented "Try to Button" which generate three different prizes. One click one random type of prize (money, loyalty points or item from list).

In right section, user can see own money balance, loyalty points balance, and on every "Try to win button" will appear prize info box. If you get item prize you can cancel this prize or order delivery. Money possible transfer to credit card. Money and Prizes are not infinite, loyalty points infinite.

Also presented input which give opportunity exchange money to loyalty points with some coefficient.
